

The electricity which can't use tap water is also in case of emergency of a stop.

The water cleaner which can be used easily

# Extra Graceful Water

"It's for emergency use." water cleaner

The feature

- It's a non-electric source system.
- It can purify water of 2 liters a minute. (20 liters per 10 minutes)
- A UF filter is let through at the end, so a virus and bacteria are also removed.
- Even a child of jakuchikara can use a hand pump.
- Handling is easy. An exchange of a cartridge is also single touch.
- It's light, so carrying is easy.
- You can always use by waterworks. (A waterworks fitting is set.)

The Water example which can be applied

Please use the water in the personal appearance

- River water, lake water, groundwater and the one of the rainwater etc. Natural water
- The bathtub water (remaining water after use) and pool water

Use method is easy.

- (1) Please insert the elbow mouth ahead of the hose in a water cleaner tightly.
  - \* Please see and check the instructions.
- (2) Please put water in a plastic container.
  - \* It's also possible by directness from water.
- (3) When a hand pump is pushed, it purifies water from the hose installed in the water cleaner. But I go out.

# The product specification
